SUMMARY

Detail-oriented graduate with a Bachelor's in Game Development and Interactive Media, skilled in Unity and C#. Experienced in developing scalable solutions and level generation systems. Adept at teamwork, problem-solving, and integrating feedback.

EXPERIENCE

Save On Foods (Seton, Cal, AB), Department Spectailist

October 2025 - Present

- Consistently displayed a high work ethic and motivation to serve in the Save On Foods community.
- Demonstrated flexibility and adaptability when presented with new tasks and responsibilities.

Independent, Revenant Skies Argent Knights (Unity)

Jan 2025 - Present

- Developed and managed personal projects, creating polished and engaging experiences by implementing realistic flight models based on real-world physics.
- Incorporated arcade elements to simplify control, making the game accessible to casual players and enhancing user engagement.
- Blended realism with fun to engage a wider audience, aiming to create an enjoyable experience for both new and experienced users.

Stellar Octopians (Team), Daybreak

Sep 2024 - Apr 2025

- Developed a level generation toolset based on layered noise functions to procedurally draw terrain, paths, and varied structures procedurally, enhancing replayability and player exploration.
- Worked on refining the tool's functionality while ensuring accessibility for collaborators and improving development efficiency.
- Implemented scalable solutions in Unity, leveraging C# to create engaging and accessible gameplay experiences.

Stellar Octopians (Team), Starlight

Sep 2023 - Apr 2024

- Developed a tile-based level generation algorithm inspired by the Wave Function Collapse technique, which enhances procedural content generation and boosts replayability.
- Created a scalable solution for integrating new gameplay mechanics, improving flexibility and user experience by encouraging player experimentation.

Stellar Octopians (Team), Moonset

Sep 2022 - Apr 2023

- Developed the player controller and primary gameplay mechanics, emphasizing player competition and enjoyable movement techniques.
- Consistently consulted and incorporated player feedback throughout development and level design, enhancing overall player reception and experience.

EDUCATION

Ontario Tech University

Bachelor of Business & Information Technology • Game Development and Interactive Media • Sep 2021 - Apr 2025

SKILLS

Receptive to feedback • Collaborative Problem Solving • Leadership • Interdisciplinary Collaboration • Creativity and Innovation • Easily Adaptable • Rapid Learning • Teamwork • Organization Skills • Time Management
